

COOL... CLEAR... AQUA...

Vianna Brasil

JJ Number 8

The blue green colors of nature are among the most popular for jewelry creators and fashion designers. One form or another of these aqua tones has been a featured color on Pantone's color picks for the last few years, evoking such names as Curacao, Aquamarine, Biscay Bay, and for 2016, Limpet Shell, which we will talk about in more detail in a later issue. Jewelry evokes these colors with the teal blue tones of aquamarine, paraiba tourmaline, turquoise, as well as other gems and enamel.
